## PROFESSIONAL SUMMARY

Business-driven Data Analyst & AI/ML Specialist pursuing an M.Com with advanced technical expertise certified by IIT Roorkee (via Intellipaat). Expert at bridging the gap between complex financial/business metrics and advanced predictive analytics. Proven track record in building Machine Learning pipelines, relational database querying (SQL), and enterprise-grade BI dashboards. Demonstrated professional readiness through high-performance corporate data simulations with Deloitte and Tata Group.

## TECHNICAL SKILLS

**AI/ML & Core Analytics:** Machine Learning (Supervised/Unsupervised), Predictive Modeling, AI/ML Pipelines, Scikit-Learn, Exploratory Data Analysis (EDA), Statistical Analysis

**Languages & Querying:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (PostgreSQL/MySQL), Advanced Excel (Power Query, Pivot Tables)

**Data Visualization & BI:** Power BI, Tableau, KPI Formulation, Interactive Dashboard Design, Executive Storytelling

**Developer Tools & Frameworks:** Git, GitHub, Jupyter Notebooks, VS Code

## TECHNICAL PROJECTS

### Customer Churn Prediction & Business Intelligence System

*Technical Stack: Python (Pandas, Scikit-Learn, Seaborn), SQL, Power BI, Git*

- Engineered a predictive AI/ML classification pipeline utilizing **Scikit-Learn (Random Forest/Logistic Regression)** to identify high-risk customer accounts, achieving an accuracy score of **88%**.
- Executed end-to-end ETL processes: resolved data quality issues, performed structural data imputation, and engineered features to isolate key churn indicators.
- Designed a dynamic multi-page **Power BI** dashboard connected to the predictive model, delivering interactive churn risk segmentations and prescriptive retention strategies to stakeholders.

### Netflix Content & Localization Strategy Analysis

*Technical Stack: Python (Pandas, NumPy, Matplotlib, Seaborn), Jupyter Notebook*

- Analyzed a dataset of **8,000+ streaming titles** using Python to evaluate global content catalog distribution, identifying key regional gaps in genre availability.
- Conducted Exploratory Data Analysis (EDA) and statistical grouping to uncover trends in release cycles, pinpointing optimized monthly release windows that historically correlated with maximum viewer engagement.
- Translated data findings into an executive-level slide deck with interactive visualization plots to outline content acquisition strategy recommendations.

### Retail Multi-Store Demand Forecasting Model

*Technical Stack: Python (Scikit-Learn, Pandas, Seaborn), Advanced Statistical Modeling*

- Developed a predictive regression model utilizing time-series feature engineering (moving averages, lag features) to forecast store-level retail sales.
- Minimized inventory stockouts and overstocking risks by aligning model predictions to evaluate seasonal demand spikes with a target Mean Absolute Percentage Error (MAPE) under **12%**.

## CORPORATE DATA SIMULATIONS

### Deloitte — Data Analytics Job Simulation (Forage)

- Acted as a Virtual Data Analyst to clean, process, and analyze complex client datasets, ensuring zero data duplication and high schema integrity.
- Developed executive-facing **Tableau dashboards** highlighting high-impact trends, turning raw operational logs into actionable performance optimization insights.

### Tata Group — Data Visualisation Job Simulation (Forage)

- Simulated consultations with corporate executives to identify high-priority business questions and translate them into visual performance metrics.
- Built dynamic KPI dashboards in **Power BI**, structuring data stories that allowed business leaders to evaluate operational efficiency instantly.

## EDUCATION

### Master of Commerce (M.Com.)

Core Focus: Quantitative Business Analysis, Corporate Finance, Business Economics

Pursuing

### Bachelor of Commerce (B.Com. Honours)

Core Focus: Business Statistics, Financial Modeling, Quantitative Economics

Graduation Year: 2024

## CERTIFICATIONS & CREDENTIALS

- Advanced Certification in Data Analyst & AI/ML** — IIT Roorkee (via Intellipaat)
- Deloitte Data Analytics Job Simulation** — Forage
- Tata Data Visualisation: Empowering Business with Effective Insights** — Forage
- Python for Data Analysis & SQL for Data Science** (Industry Certified)
